

STAY ACTIVE AND FEEL THE ORIGINAL DIFFERENCE

Osteoarthritis (OA) is a progressive joint disease due to failure in repairing of damaged cartilage in the joint. This allows the unprotected bones to rub against each other, therefore leading to joint pain, stiffness, swelling, inflammation and losing the ability to move smoothly. When symptoms of OA begin to show, people more than often conclude that the pain of osteoarthritis spelled the end of their love for active outdoor lifestyles and the beginning of life indoors with limited movement.

Research has demonstrated that 3-in-1 combination of glucosamine-chondroitin-MSM appears to act synergistically to slow down the progression of joint degeneration, stimulate the production of new cartilage, have anti-inflammatory effect and improve mobility in people with OA. Different brands contain different amount, quality and purity of glucosamine, chondroitin and MSM. It is important to insist on clinically proven formulation and original pharmaceutical grade ingredients used in clinical studies.

Life does not have to be any less fun and sweet just because you have OA, just as these 2 consumers found out.

What people are saying!

“ I am physically active and loved to exercise whenever and wherever I can. However, I no longer enjoy yoga and muscle toning exercise like deep squat and bicycle crunch like I used to. My joints are giving me signals and my movements are no longer as smooth. There were “knocking” sound from the knee, especially with movements like squat exercise. I decided to give CS b-Bioactive® and OptiMSM® triple action a try as it can relieve joint pain. **I have less weird “knocking” sound from my knee and can now resume my exercise after 3 weeks of consumption.** ”

- **MEONNE** - 30 years old, Kuala Lumpur

“ I enjoyed running every evening and hiking during the weekend. The pain got so severe that I have to stop these activities. The pharmacist explained to me that my knee pain was due that the cartilage has been worn-off due to my choice of exercise. She then introduced me to CS b-Bioactive® and OptiMSM®, once-a-day powder as I don't like taking pills a few times daily. **I started to feel significant pain relief from the 3rd month and has continue taking since. I'm glad that I can now resume my running and hiking as before.** ”

- **WANG** - 52 year old, Melaka
