

FEEL THE ORIGINAL DIFFERENCE

Osteoarthritis (OA) is a progressive joint disease due to failure in repairing of damaged cartilage in the joint. This allows the unprotected bones to rub against each other, therefore leading to joint pain, stiffness, swelling, inflammation and losing the ability to move smoothly. When diagnosed with OA, people more than often conclude that the pain of osteoarthritis spelled life indoors with limited movement. Life does not have to be any less fun and sweet just because you have OA.

Research has demonstrated that 3-in-1 combination of glucosamine-chondroitin-MSM appears to act synergistically to slow down the progression of joint degeneration, stimulate the production of new cartilage, have anti-inflammatory effect and improve mobility in people with OA. Different brands contain different amount, quality and purity of glucosamine, chondroitin and MSM. It is important to insist on clinically proven formulation and original pharmaceutical grade ingredients used in the clinical studies.

What people are saying!

“ I enjoyed running every evening and hiking during the weekend. The pain got so severe that I have to stop these activities. The pharmacist explained to me that my knee pain was due that the cartilage has been worn-off due to my choice of exercise. She then introduced me to CS b-Bioactive® and OptiMSM®, once-a-day powder as I don't like taking pills a few times daily. **I started to feel significant pain relief from the 3rd month and has continue taking since. I'm glad that I can now resume my running and hiking as before.** ”

- **WANG** - 52 year old, Melaka

“ I suffered chronic knee pain for the past 10 years. The pain was unbearable, intense and affected my life as a hawker which requires me to stand 12 hours a day. My pharmacist introduced me to CS b-Bioactive® and OptiMSM®. **After taking for 3 months, the pain has been greatly reduced. I have been taking for almost 3 years and the pain has gone and I can move about easily.** ”

- **LEE** - 73 years old, Penang
